

HD TOOL INTERFACE BOX

SKU: TIB001

Categories: [Cased Hole Wireline](#), [HD Platform™](#), [Surface Acquisition](#), [Surface Systems](#), [Telemetry](#)

PRODUCT DESCRIPTION

The Tool Interface Box (TIB001) is a USB device that replaces the Surface Modem and TCU or Memory Tool for tool testing purposes.

When used with Warrior Version 8 it allows single Production Logging Tool sensors, or complete Production Logging Strings to be checked.

Version Control: 2021.12.14

On-line specifications are for REFERENCE ONLY and subject to change without notice. DO NOT USE FOR FIELD OPERATIONS.
